

3,500 Lumens 1080p Home and Business Projector

PX703HD

- 1.3X optical zoom
- SuperColor™ technology
- Energy-efficient SmartEco+ Mode
- Vertical Lens Shift
- vColorTuner

The ViewSonic PX703HD is a practical Home Cinema Projector, featuring 3500 ANSI lumens, 1080p Full HD resolution, and ViewSonic's exclusive SuperColor™ technology, which together produce the finest of details and stunning colour in any medium sized space. The projector comes with an energy-saving SuperEco+ mode that reduces power consumption and extends lamp life to up to 20,000 hours, reducing the frequency of lamp replacement and lowering maintenance costs. Digital lens shift and 1.3x optical zoom make flexible installation a breeze. Users can also utilise the vColorTuner software and cloud-based colour profile exchange to create customised colour profiles, share them, or download other profiles to fine-tune them as their own. Dual HDMI inputs and USB power supply further increase the flexibility of the user's entertainment experience.

Bright Images Every Time

Images on the PX703HD look bright under any lighting condition. Thanks to a high brightness of 3,500 ANSI Lumens your images won't get washed out when watching movies or playing games during the day or with the lights on.

3,500 ANSI Lumens

Fine Detail and Clarity

Full HD 1080p (1920 x 1080) resolution projection delivers clearly displayed information and ultra-sharp image quality.

Adaptable to any environment

Equipped with a 1.3x optical zoom lens, the projector empowers users to choose the most ideal set-up location that doesn't interfere with existing interior design while still getting the desired image size.

1.3x Optical Zoom

Flexibility in Image Projection

The projector offers 10% flexibility of vertical image adjustment, so users can shift the image up or down without distorting the image with remote control, making the installation quicker and easier.

True-to-life Colour Performance

ViewSonic's proprietary SuperColor™ Technology offers a wider colour range, ensuring users enjoy true-to-life colour projection in both bright and dark environments.

SuperColor™ Technology

A More Comfortable Viewing Experience

Utilising reflective light, which bounces off the wall or projector screen before hitting your eyes, the projector makes the viewing experience virtually blue light free, less invasive to your sight and reduces eyestrain over prolonged viewing periods.

Eye Care

Colour Profile Preference with vColorTuner

By using a cloud-based colour profile exchange, users can create their own colour profile to fit their preferences and share with others.

Also, users can download other profiles from their projectors and fine-tune them as their own.

vColorTuner

A Simpler Way to Update Projector Software

ViewSonic Projector Software Update is available online and gives you the ability to keep your projector firmware up to date easily and conveniently; no need to take your projector in to a service center for software updates.

Projector Software Update

Enhanced Gaming Experience

3X fast input allows you to deliver attacks right when you want to with virtually no delay, giving you a competitive advantage and taking your gaming experience to the next level.

Extensive Connectivity

Dual HDMI ports provide enough connectivity to support any of your HDMI multimedia devices, delivering a big screen experience for any occasion.

Dual HDMI

HDMI X 2

Integrated Power Source

A built-in 5V/1.5A USB power output can be used to supply power to HDMI wireless dongles, eliminating the need for separate power adapters when streaming your favourite multimedia content.

USB Power Supply

Energy-Efficient SuperEco+ Mode for a Lamp Life of up to 20,000 Hours

The latest SuperEco+ mode technology greatly extends the lamp life of the projector from 15,000 hours to 20,000 hours of use with an input signal. That means it could be used 4 hours a day for more than 13 years with no degradation in brightness.

SuperEco+ Mode

Immersive 3D Viewing

Project 3D content directly from 3D Blu-Ray players and HDMI-enabled devices such as laptops, tablets, and media players via HDMI connection.
